

Carissa Ying Geok Teng (A0205190R/E0425113)

1i)

Fluents

Vans: V_1, V_2, \dots, V_n

Grid: s_0, s_1, \dots, s_g

Package: P_1, P_2, \dots, P_k

Direction: up, down, left, right

Predicates

$\text{Van}(v)$, $\text{Grid}(s)$, $\text{Package}(p)$, $\text{Direction}(d)$ tells what type each fluent is.

$\text{At}(o, s)$ tells if a van or package, o , is at a grid location, s .

$\text{Available}(s)$ tells if a grid location is empty.

$\text{Facing}(v, d)$ tells if van, v is facing a direction, d .

$\text{FaceLeft}(d_1, d_2)$, $\text{FaceRight}(d_1, d_2)$ tells if direction d_2 is the new direction to face if a left or right is taken from d_1 .

$\text{Left}(a, b, d)$, $\text{Right}(a, b, d)$, $\text{Front}(a, b, d)$ tells if given a specific direction, d , to face, is grid location b to the left, right, or front of a .

$\text{Carrying}(v, p)$ tells if a van, v is carrying a package, p .

$\text{Full}(v)$ tells if a van cannot carry any more packages.

1ii)

Primitive actions

Action: $\text{TurnLeft}(v, \text{from}, \text{to}, d_1, d_2)$

Precond: $\text{Van}(v) \wedge \text{Grid}(\text{from}) \wedge \text{Grid}(\text{to}) \wedge \text{Direction}(d_1) \wedge \text{Direction}(d_2) \wedge \text{At}(v, \text{from}) \wedge \text{Available}(\text{to}) \wedge \text{Facing}(v, d_1) \wedge \text{Left}(\text{from}, \text{to}, d_1) \wedge \text{FaceLeft}(d_1, d_2)$

Effect: $\sim \text{Available}(\text{to}) \wedge \text{Available}(\text{from}) \wedge \sim \text{At}(v, \text{from}) \wedge \text{At}(v, \text{to}) \wedge \sim \text{Facing}(v, d_1) \wedge \text{Facing}(v, d_2)$

Action: $\text{TurnRight}(v, \text{from}, \text{to}, d_1, d_2)$

Precond: $\text{Van}(v) \wedge \text{Grid}(\text{from}) \wedge \text{Grid}(\text{to}) \wedge \text{Direction}(d_1) \wedge \text{Direction}(d_2) \wedge \text{At}(v, \text{from}) \wedge \text{Available}(\text{to}) \wedge \text{Facing}(v, d_1) \wedge \text{Right}(\text{from}, \text{to}, d_1) \wedge \text{FaceRight}(d_1, d_2)$

Effect: $\sim \text{Available}(\text{to}) \wedge \text{Available}(\text{from}) \wedge \sim \text{At}(v, \text{from}) \wedge \text{At}(v, \text{to}) \wedge \sim \text{Facing}(v, d_1) \wedge \text{Facing}(v, d_2)$

Action: $\text{GoForward}(v, \text{from}, \text{to}, d)$

Precond: $\text{Van}(v) \wedge \text{Grid}(\text{from}) \wedge \text{Grid}(\text{to}) \wedge \text{Direction}(d) \wedge \text{At}(v, \text{from}) \wedge \text{Available}(\text{to}) \wedge \text{Facing}(v, d) \wedge \text{Front}(\text{from}, \text{to}, d)$

Effect: $\sim \text{Available}(\text{to}) \wedge \text{Available}(\text{from}) \wedge \sim \text{At}(v, \text{from}) \wedge \text{At}(v, \text{to})$

Action: $\text{Load}(p, v, s)$

Precond: $\text{Van}(v) \wedge \text{Package}(p) \wedge \text{Grid}(s) \wedge \sim \text{Full}(v) \wedge \text{At}(v, s) \wedge \text{At}(p, s)$

Effect: $\sim \text{At}(p, s) \wedge \text{Carrying}(v, p) \wedge \text{Full}(v)$

Action: $\text{Unload}(p, v, s)$

Precond: $\text{Van}(v) \wedge \text{Package}(p) \wedge \text{Grid}(s) \wedge \text{At}(v, s) \wedge \text{Carrying}(v, p)$

Effect: $\text{At}(p, s) \wedge \sim \text{Carrying}(v, p) \wedge \sim \text{Full}(v)$

High Level Actions

Action: $\text{DeliverAllPackages}()$

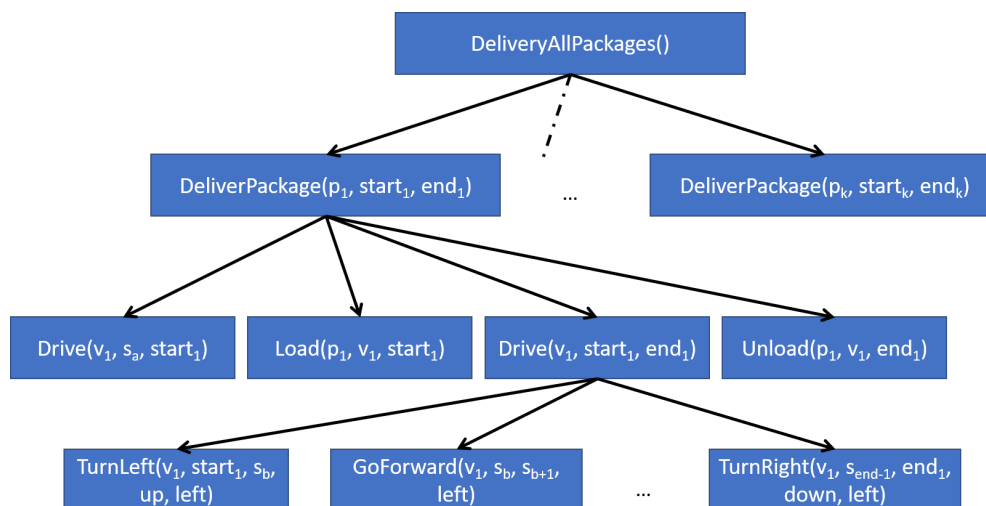

Action: $\text{DeliverPackage}(p, \text{start}, \text{end})$

Precond: $\text{At}(p, \text{start})$

Action: $\text{Drive}(v, \text{start}, \text{end})$

Precond: $\text{At}(v, \text{start})$

1iii)

2)

$$EU(\text{Game}) = \sum_{i=1} P(\text{1st head on the } i\text{th toss}) * 2^i$$

$$= 0.5^1(2^1) + 0.5^2(2^2) + 0.5^3(2^3) + \dots$$

$$= 1 + 1 + 1 + \dots$$

$$= \infty$$

3)

Assuming if a move is invalid, the agent will stay in the same place,

$$P(4,3) = P(\text{Right, Right, Up, Up, Right}) + P(\text{Up, Up, Right, Right, Right})$$

$$= (0.8*0.8*0.1*0.8*0.1) + (0.1*0.1*0.8*0.1*0.1)$$

$$= 0.0052$$

$$\begin{aligned} P(4,2) = & P(\text{Right, Right, Right, Up}) + P(\text{Right, Right, Up, Right}) + P(\text{Down, Right, Right, Right, Up}) + \\ & P(\text{Down, Right, Right, Up, Right}) + P(\text{Right, Down, Right, Right, Up}) + P(\text{Right, Down, Right, Up, Right}) \\ & + P(\text{Right, Up, Right, Right, Up}) + P(\text{Right, Up, Right, Up, Right}) + P(\text{Right, Right, Down, Right, Up}) + \\ & P(\text{Right, Right, Down, Up, Right}) + P(\text{Right, Right, Right, Right, Up}) + P(\text{Right, Right, Up, Left, Right}) \end{aligned}$$

$$\begin{aligned} = & (0.8*0.8*0.8*0.8) + (0.8*0.8*0.1*0.1) + (0.1*0.8*0.8*0.1*0.8) + (0.1*0.8*0.8*0.8*0.1) + \\ & (0.8*0.1*0.8*0.1*0.8) + (0.8*0.1*0.8*0.8*0.1) + (0.8*0.1*0.8*0.1*0.8) + (0.8*0.1*0.8*0.8*0.1) + \\ & (0.8*0.8*0.1*0.1*0.8) + (0.8*0.8*0.1*0.8*0.1) + (0.8*0.8*0.8*0.1*0.8) + (0.8*0.8*0.1*0.1*0.1) \end{aligned}$$

$$= 0.49856$$
